ed@fua:~/UTN-DevOps/utn-devops$ vagrant ssh
Welcome to Ubuntu 22.04.5 LTS (GNU/Linux 6.8.0-107-generic x86_64)

 * Documentation:  https://help.ubuntu.com
 * Management:     https://landscape.canonical.com
 * Support:        https://ubuntu.com/pro

 System information as of Wed Apr  8 14:51:43 -03 2026

  System load:             1.85
  Usage of /:              27.0% of 38.70GB
  Memory usage:            64%
  Swap usage:              4%
  Processes:               129
  Users logged in:         0
  IPv4 address for enp0s3: 10.0.2.15
  IPv6 address for enp0s3: fd17:625c:f037:2:b3:94ff:feb0:5438

Expanded Security Maintenance for Applications is not enabled.

46 updates can be applied immediately.
41 of these updates are standard security updates.
To see these additional updates run: apt list --upgradable

Enable ESM Apps to receive additional future security updates.
See https://ubuntu.com/esm or run: sudo pro status

New release '24.04.4 LTS' available.
```

DevOpsAppTest
Select an item type
Pipeline
Gestiona actividades de larga duración que pueden abarcar varios agentes de construcción. Apropiado para construir pipelines (conocidas anteriormente como workflows) y/o para la organización de actividades complejas que no se pueden articular facilmente con tareas de tipo freestyle.
Crear un proyecto de estilo libre
Classic, general-purpose job type that checks out from up to one SCM, executes build steps serially, followed by post-build steps like archiving artifacts and sending email notifications.
Crear un proyecto multi-configuración
Adecuado para proyectos que requieran un gran número de configuraciones diferentes, como testear en multiples entornos, ejecutar sobre plataformas concretas, etc.
